Description

This linear Rapid release fitting system designed to accommodate MONOKEY series cases consists of quick release black tubular side case holders for the mounting of two side cases, light but at the same time robust. Its essential lines however do not spoil the motorcycle profile and its simple quick release mechanism allows you install or remove this mounting hardware easily and efficiently. PLR series tubular side frames can be combined with GIVI's Monorack system to add a top trunk solution, additional hardware maybe required to mount PLR series frames for side case use only.

Only works on years 2011-2014
