Description

Universal smoked spoiler mountable to fairings / windscreens; the aluminum fitting kit allows to adjust both height and inclination. The customer needs to confirm the original fairing/windscreen is rigid enough to allow the mounting of the SHIELD +

Shield+ is made entirely of billet aluminum and is manufactured one piece at a time with numerical controlled milling, then finally anodized. The high quality raw material is found even in aeronautical engineering for its excellent weight-performance and high resistance to corrosion. The screen is 4mm thick and is made of a polymeric material approved by TUV, compared to glass this is more lightweight, about half the weight. - The fitting is simple and safe, in fact in order to install it, it is not necessary to modify or create any holes in the original windshield. - It fits onto any form of windshield for motorcycles and scooters on the market: the lock keys are included in the package. - The sleeves are made of a technical material that does not ruin the windshield and guarantees optimum grip even at high speed, making the Shield + a reliable protection to deflect the air flow.
