Description

The Special Rack (SR) fitting system for the application of a top case is typically the addition of a luggage rack to the motorcycle/scooter where one did not previously exist. This clean and compact mounting solution does not detract from the motorcycle profile making this system the ideal solution for scooter and maxi-scooters and well as select motorcycle models. The SR685 is designed to work with Monokey cases only and still allows access to the tool compartment. All parts needed to mount the top case hardware are included and it installs using simple hand tools.
